

BERTONCINI

ENGINEERING

Bertoncini Engineering, established in 1965, is hiring CNC Lathe Machinist and First Class Machinists at its Bibra Lake Workshop with immediate start at an attractive wage.

About the Role :

- Be hardworking, reliable and honest
- Have a high level of energy and commitment
- Have an ability to work autonomously in an environment where safety is a priority
- Be an independent thinker and problem solver
- Pay high attention to detail with clean and tidy work habits
- Have excellent communication skills to liaise with other team members
- Own reliable transport and current driver's license, Forklift license would be beneficial but not essential
- Looking for a long-term permanent position

Essential Criteria :

- Relevant trades qualification with a minimum of 5 years' experience
- Experience with Centre Lathe is desirable
- Strong ability to independently read and understand detailed drawings and work samples
- Demonstrate a thorough understanding of required setup, tooling and materials
- Experience in all aspects and skills of the trade that can allow successful completion of the job thru the workshop
- Demonstrate leadership qualities in the workplace
- Observe and comply with all OH&S requirements

Job Tasks and Responsibilities

- Complete machining dimensional inspection sheets
- Monitor equipment condition, report and follow through any faults.
- Assist in workshop equipment and maintenance

Qualifications and Experience

- Minimum Certificate III in Engineering, or relevant experience within the Australian Qualifications Framework (AQF).
- At least three years post apprenticeship relevant experience.

You will be skills tested to ensure your suitability for this position

We are an equal opportunity employer
